[Novel Coronavirus \(COVID-19\)](#) FAO's Big Data Tool on food chains under the COVID-19 pandemic

UT continues to pursue research and other sponsored activity where work can be done remotely, and/or laboratory-based work is done both with existing safety protocols and practicing of social distancing. Work such as analyzing data, writing and reviewing manuscripts, preparing presentations, developing new grant proposals, convening online discussions with students and lab staff, and online compliance training is strongly advised. See [UTIA Lunch & Learn training materials/videos](#), [CITI Training](#), and [K@TE](#) for online learning ideas for you and your team, including students.

Submission of new proposals is encouraged, and the UTIA Office of Sponsored Programs is able to assist, while conducting work remotely. Should issues arise, please contact Jane Burns at janeburns@utk.edu.

Thank you for continuing to pursue your research, outreach, and scholarly programs with colleagues and students in your research group during these extraordinary times.

Farm and Ranch Stress Assistance Network

The purpose of this program is to establish a network that connects individuals who are engaged in farming, ranching, and other agriculture-related occupations to stress assistance programs. The establishment of a network that assists farmers and ranchers in time of stress can offer a conduit to improving behavioral health awareness, literacy, and outcomes for agricultural producers, workers and their families.

Renewable Resources Extension Act—National Focus Fund Projects (RREA_NFF)

The goal of this program is to enhance the sustainability of the nation's forest and rangeland resources and to enable landowners and managers to achieve their desired goals and objectives by making resource management decisions based on sound research findings. Forest and rangeland resources include vegetation, water, fisheries and wildlife, soil, and recreation. These projects must maximize the capacity, reach, and impact of the Cooperative Extension System—Extension Forestry and Rangeland Programs and must directly work across state boundaries to share expertise to address common problems.

Independent Scientist Award

The purpose of the NIH Independent Scientist Award (K02) is to foster the development of outstanding scientists and enable them to expand their potential to make significant contributions to their field of research. The K02 award provides three to five years of salary support and "protected time" for newly independent scientists who can demonstrate the need for a period of intensive research focus as a means of enhancing their research careers. Each independent scientist career award program must be tailored to meet the individual needs of the candidate.
