Cold Chain Impact Assessment in the Philippines and Nigeria
USDA has implemented a number of programs related to cold chain technology over the past twenty years, in particular in the Philippines and Nigeria. These two countries have national cold chain associations which have benefitted from various USDA-funded cold chain programs. USDA seeks to support improved understanding of how these programs have impacted the cold chain as it relates to agricultural commodities in general and agricultural trade in particular.
Application Deadline: 8/16/21 | View Opportunity
Please see NIFA Upcoming RFA Calendar and email aggrant@tennessee.edu to apply.

Field Initiated Projects Program (Research)
The purpose of the program is to generate new knowledge through research or to develop methods, procedures, and rehabilitation technologies that maximize the full inclusion and integration into society, employment, independent living, family support, and economic and self-sufficiency of people with disabilities, especially people with the highest support needs.
Application Deadline: TBD | View Opportunity

National Priorities: Water Innovation, Science, Engagement to Advance Water Reuse
The US Environmental Protection Agency (EPA) is seeking applications proposing to accelerate water innovation, information availability, and engagement to advance clean and safe water reuse goals, promote better understanding of the nation’s water and wastewater treatment and infrastructure, and enhance the availability and efficient use of water resources through water reuse. This request for applications is intended to address multiple water reuse sources and applications to support national efforts to reduce technological and institutional barriers for expanded water reuse.
Application Deadline: 9/29/21 | View Opportunity
Aging Research in Animals (ARIA): Promoting Rigorous Research on Behavioral and Social Processes

The overarching objective of this funding opportunity announcement is to develop and strengthen animal models for behavioral and social research in the interest of furthering the mechanistic understanding of how social and physical environmental factors contribute to aging processes and the etiology and progression of age-related conditions and diseases with the explicit two-fold goal of identifying socio-environmental sources of aging processes and advancing the integration of behavioral, social, and environmental measures into biological hallmarks of aging.

Application Deadline: 10/20/21 | View Opportunity RFA-AG-22-015

Animal Health Systems Facilitating Trade within the African Union

The implementation of Animal Health Strategy for Africa will lead to improved capacity to anticipate and mitigate the negative impacts of animal diseases, zoonosis, climate change, and disasters for healthy and productive animal populations and increased access to regional and international markets for
African animals and animal products. This program seeks to harmonize sanitary and phytosanitary processes to improve animal health systems at the continental, regional, and bilateral levels.

Application Deadline: 8/13/21 | View Opportunity

**Developing A Framework For Quantifying And Analysing Non-Tariff Measures (NTM)**

International trade is very important to US agriculture, with 20 percent of all US farm products exported. US agriculture and food industries produce and export a diverse array of products. USDA/FAS seeks applied research into identifying and quantifying the impact of NTMs on trade. To enhance understanding of NTMs and contribute towards creating and securing opportunities for US agriculture and food products in foreign markets, the recipient will develop a robust modeling framework that capitalizes on the latest empirical developments to estimate and evaluate the economic costs of NTMs on US agricultural trade.

Application Deadline: 9/15/21 | View Opportunity

**Poultry Value Chain Assessment in Tanzania**

USDA/FAS seeks to support applied research to better understand the supply chain and market system for poultry and eggs in Tanzania. Using quantitative, qualitative, and mixed-methods approaches, such research would identify existing barriers to trade, gaps in technical assistance, and capacity building opportunities to increase the availability of poultry products to Tanzanian consumers, through increased local production and imports.

Application Deadline: 9/15/21 | View Opportunity

**Foundations & Nonprofits**

**USSEC**

**U.S. Soybean Export Council**

**Poultry Management Honors Course**
The purpose of this request for proposal is to seek proposals for conducting a Poultry Management Honors Course for participants from South Asia. Through a global network of international offices and strong support in the US, USSEC helps build a preference for US soybeans and soybean products, advocates for the use of soy in feed, aquaculture and human consumption, promotes the benefits of soy use through education, and connects industry leaders through a robust membership program.

Application Deadline: 8/6/21 | View Opportunity

---

**Equine Colic Grant Proposals**

Research proposals are invited on the topic of equine colic, must be focused on the intestinal tract, and must address one or more of the following areas: risk factors, prevention or early detection, feeding and nutrition, or pathophysiology.

Application Deadline: 9/27/21 | View Opportunity
