Funding Opportunities Weekly Digest–May 11, 2021

Check out the Office of Sponsored Programs website to view more funding opportunities to consider.

Federal

Local Food Promotion Program (LFPP)
LFPP funds projects that develop, coordinate, and expand local and regional food business enterprises that engage as intermediaries in indirect producer to consumer marketing to help increase access to and availability of locally and
USDA ARS Regional Food System Partnerships (RFSP)
The RFSP supports partnerships that connect public and private resources to plan and develop local or regional food systems. The RFSP focuses on building and strengthening local or regional food economy viability and resilience, including pandemic response and recovery. Applicants will work with their partners to catalyze the development of local or regional food systems.
Application Deadline: 7/6/21 | View Opportunity

Please see NIFA Upcoming RFA Calendar and email aggrant@tennessee.edu to apply.
North American Wetlands Conservation Act

The US Standard Grants Program is a competitive, matching grant program that supports public-private partnerships carrying out projects in the United States that further the goals of the North American Wetlands Conservation Act. Projects must involve only long-term protection, restoration, enhancement, and/or establishment of wetland and associated upland habitats to benefit migratory birds. The program requires a 1:1 non-federal match and research funding is ineligible. This program supports the Department of Interior and US Fish and Wildlife Service mission of protecting and managing the nation's natural resources by collaborating with partners and stakeholders to conserve land and water and to expand outdoor recreation and access.

Application Deadline: 7/9/21 | View Opportunity

Integrated Pathogen Reduction Technologies for Whole Blood and Blood Components for Transfusion

The overall goal is to develop a pathogen reduction technology which can be used on whole blood, which can be separated into individual blood components (platelets, red blood cells, and plasma) with no further pathogen inactivation.
treatments upon separation. This research is intended to support advances in regulatory science that allow for development of next generation PRTs for blood safety.
Application Deadline: 7/6/21 | View Opportunity

Exercise and Nutrition Interventions to Improve Cancer Treatment-Related Outcomes in Cancer Survivors Consortium

The National Cancer Institute seeks to support exercise and/or medical nutrition intervention research designed to improve cancer treatment-related outcomes for therapies delivered with curative or life-extending intent to cancer survivors. Projects may include either pediatric or adult cancer patient populations and must identify a treatment-related outcome as a primary endpoint and specify a relevant patient-reported secondary outcome(s). Priority will be given to studies with direct clinical relevance and translational potential. Responsive applications will fill a research gap concerning the efficacy of specific exercise and dietary approaches to improve cancer treatment-related outcomes. Information gained should improve behavioral intervention protocols for cancer survivors undergoing cancer treatment and may also generate feasibility information concerning translation into clinical care. Awardees will participate in an Exercise and Nutrition to Improve Cancer Treatment-Related Outcomes in Cancer Survivors Consortium.
LOI Due: 6/14/21 | Application Deadline: 7/14/21 | View Opportunity

2022 Sponsorship for Human-Animal Bond Studies
Purina aims to encourage high-quality scientific studies that lead to a better understanding of the human-animal bond. We seek to promote fundamental knowledge of the benefits that cats and dogs bring to us in different environments and situations. Purina will also encourage communication of the study findings, so the benefits of the human-animal bond can reach people and their cats and dogs worldwide.
Application Deadline: 7/15/21 | View Opportunity

International

2021 International Agricultural Education Fellowship Program
The International Agricultural Education Fellowship Program will provide opportunities to eligible US citizens with a bachelor's degree and agricultural experience, curriculum development, or program development to assist developing countries in establishing school-based agricultural education and youth extension programs under the Agriculture Improvement Act of 2018. USDA anticipates issuing up to two awards to improve the abilities of developing countries to meet their food and fiber needs, as well as strengthen trade linkages between the US and selected countries. Each award is expected...
Practical and Strategic Education for the Next Generation of Ag-Business Leaders-Emerging Markets

USSEC seeks proposals from qualified universities and/or educational organizations to develop a tailored executive education program on agribusiness management for USSEC’s customers in El Salvador, Honduras, and Nicaragua. This program will include live virtual and on-demand virtual components. The contractor should have experience offering similar programs, expertise in business management, familiarity with livestock, aquaculture, and/or feed businesses, and knowledge of the business environment in El Salvador, Honduras and Nicaragua.
