Community Wood Energy and Wood Innovation Program
The U.S. Forest Service (Forest Service) requests proposals for projects to install a thermally led community wood energy system or build an innovative wood product facility. The grants awarded under this announcement are authorized by the Agriculture Improvement Act of 2018 (7 U.S. Code § 8113) and intended to support forest health and stimulate local economies by expanding renewable wood energy use and innovative wood products manufacturing capacity.

Feed the Future Bangladesh Livestock and Nutrition Activity
The goal of this activity is to sustainably increase livestock productivity, marketability, and consumption of livestock products within the Feed the Future Zone of Influence. The activity will facilitate productivity enhancing technologies and practices such as processing and preservation of fodder for year-round livestock feeding; support enhanced dairy processing and preservation into diversified nutritious products, as a means to increase consumption of dairy products, especially in rural areas; promote the consumption of diversified and safe livestock products, especially in the rural areas; collaborate with

Sustainable Regional Systems Research Networks  
Application Deadline: 1/11/21 | NSF 20-611

Harnessing the Data Revolution: Institutes for Data-Intensive Research in Science and Engineering  
This solicitation will establish a group of HDR Institutes for data-intensive research in science and engineering that can accelerate discovery and
innovation in a broad array of research domains. The HDR Institutes will lead innovation by harnessing diverse data sources and developing and applying new methodologies, technologies, and infrastructure for data management and analysis. The HDR Institutes will support convergence between science and engineering research communities as well as expertise in data science foundations, systems, applications, and cyberinfrastructure. In addition, the HDR Institutes will enable breakthroughs in science and engineering through collaborative, co-designed programs to formulate innovative data-intensive approaches to address critical national challenges.

Irrigation Innovation Consortium 2021  
The Irrigation Innovation Consortium (IIC) has $600,000 available to support collaborative research that aims to accelerate the development and adoption of water and energy-efficient irrigation technologies, tools, and practices. Research projects will address gaps important to the irrigation sector and/or end users of irrigation in agriculture, landscape, or turf applications.

FFAR Seeks Nominations for 2020 New Innovator in Food and Agriculture Research Award  
FFAR intends to grant up to ten Awards to early-career scientists pursuing research that supports the Foundation's Challenge Areas and promotes global, sustainable food production. Each applicant is eligible to receive up to $150,000 per year for a maximum of three years totaling $450,000 from FFAR. For the first time, FFAR is not requiring awardees to secure matching funds, opening this opportunity to a wider pool of applicants. Application Deadline: 3/25/21 | View Opportunity
