

“The Friedrich-Loeffler-Institut, Federal Research Institute for Animal Health, Riems Island, Germany: Past-Presence-Future”

Dr. Jens Peter Teifke

Professor, Justus-Liebig-University

Official Veterinarian, Friedrich-Loeffler-Institut, Isle of Riems

Head, Pathology Laboratory

Head, Dept of Experimental Animal Facilities and Biorisk (Biosecurity) Management

Dr. Teifke is a board certified (ACVP) pathologist who will present on the history of the Friedrich-Loeffler-Institut including its importance in foot and mouth disease detection, current responsibilities as the supreme authority (APHIS/ARS equivalent) in the Federal Ministry for Agriculture (USDA equivalent), and ongoing high security research activities including animal models for human disease, e.g. hemorrhagic fevers, like CSF/ASF, RHD, and HPAI.
